DETAILED ACTION

Acknowledgment is made of the receipt of the amendment filed on 10/15/02. Claims 1-113 are currently pending.

Election/Restrictions

1. This application contains claims 1-59 drawn to an invention nonelected with traverse in Paper No. 6. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 60-113 are rejected under 35 U.S.C. 102(e) as being anticipated by Mowry, Jr. (US 6,050,607) (hereinafter referred to as 'Mowry').

Mowry teaches a security document 10 having a security image area 12 divided into a plurality of image cells 22. The security image is arranged to define an image conveying a hidden indication of document authenticity. An array of image cells 22 comprise a uniform array of adjacent rows and columns across the security image area 20. As illustrated in fig. 7-9, printed units 26, 28 are positioned such that image element cells 22 including respective printed tiling elements 24 define substantially uniform repeating element array (col. 5, line 53-col. 6, line 25). A security document reader reads data or a security image printed on the security document (col. 8, lines 25-33).

Response to Arguments

4. Applicant's arguments with respect to claims 60-113 have been considered but are moot in view of the new ground(s) of rejection.

The inclusion of the newly cited limitations including "wherein the step of disposing includes interleaving on the surface the symbols of each set with at least one symbol of at least another set of the plurality of sets of symbols" in independent claim 60 prompted the examiner to make a new rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
